Education

Vellore Institute of Technology

B.Tech in Computer Science and Engineering (CGPA: 8.89/10)

Bhopal, MP

Aug 2023 – Aug 2027

Shradhalaya Public School

Senior Secondary (Class XII) – 89%

CBSE

Completed 2023

St. Paul's Secondary School

Secondary (Class X) – 95%

CBSE

Completed 2021

Technical Skills

Languages: Python, SQL, Java

GenAI & Orchestration: LangChain, LangGraph, Ollama, Hugging Face, LLM Evaluations (JEV)

Databases & Vector Storage: Supabase (PostgreSQL / pgvector), ChromaDB, FAISS, MySQL

Frameworks & Libraries: PyTorch, TensorFlow, OpenCV

Developer Tools: Git, GitHub, Docker, VS Code

Core Concepts: RAG, Agent Harnesses, Semantic Search, Data Structures & Algorithms

Projects

CogniCode: Agentic Code Intelligence System

2026

LangGraph, LangChain, Python, Vector Search

tinyurl.com/Cognicode

- Engineered an autonomous multi-agent code analysis pipeline using LangGraph for code generation and linting.
- Implemented stateful graph workflows with reviewer and executor agents to handle syntax and logic self-correction.
- Integrated vector retrieval over source repositories and benchmarked output correctness using LLM-as-a-Judge (JEV).

Chat with PDF using Local LLM

2025

LangChain, Ollama, Vector Search, Python

tinyurl.com/chatwith-p

- Built an offline RAG pipeline for grounded question-answering over multi-page technical PDFs using Ollama.
- Applied recursive character chunking with overlap and vector embeddings to optimize top-*k* context retrieval.
- Orchestrated local model inference via LangChain, eliminating external API costs and ensuring complete data privacy.

Brain Tumor Classification System

2024

TensorFlow, CNN, Computer Vision

tinyurl.com/brain-tumor-class

- Developed a Convolutional Neural Network (CNN) in TensorFlow to classify MRI brain scans into tumor categories.
- Automated data pipelines with image preprocessing, normalization, and augmentation to improve generalization.
- Achieved 95% validation accuracy across test sets through hyperparameter tuning and cross-validation.

Achievements

- Selected for the **Amazon ML Summer School**, covering machine learning, deep learning, and scalable AI workflows.
- Solved **225+ algorithmic problems** across Codeforces and LeetCode, strengthening core algorithmic problem-solving.
- Maintained an active open-source portfolio with deployed full-stack web and applied AI repositories.

Certifications

- Amazon Machine Learning Summer School
- Modern Computer Vision (Deep Learning & OpenCV)
- Python for Machine Learning & Data Science
