SUMMARY

Highly motivated and creative Computer Science undergraduate currently in the third year, with strong hands-on experience in Artificial Intelligence, Machine Learning, backend automation, and containerized deployments. Proficient in Python, Java, C++, and modern AI frameworks. Experienced in building scalable AI systems, automated workflows, and REST APIs. Actively seeking opportunities to contribute to impactful projects in a collaborative environment.

TECHNICAL SKILLS

Languages: Python, Java, C++, HTML, CSS

Libraries & Frameworks: TensorFlow, PyTorch, OpenCV, Scikit-learn, NumPy, Pandas

LangChain, RAGs, Streamlit, FastAPI, Hugging Face Transformers

Databases & Tools: MongoDB, Supabase, Git, Docker, VS Code, Postman

Concepts: ML, DL, CV, NLP, Model Deployment, REST APIs, DSA (Java)

PROJECTS

Anime Recommendation System

Mar 2024 – Apr 2024

Recommendation System — Python, Streamlit, MyAnimeList API

- Developed a responsive and interactive anime recommendation system integrating multiple MyAnimeList APIs.
- Implemented content-based filtering using genres, score, and popularity.
- Enhanced user experience with a clean UI using Streamlit.
- GitHub Link: [anime_recommedation](#)

Brain Tumor Classification System

Jan 2025 – Mar 2025

Medical Imaging — Python, TensorFlow, CNN, OpenCV

- Built a CNN to classify MRI brain scans into tumor vs non-tumor categories.
- Applied data augmentation, preprocessing, and model tuning for improved accuracy.
- Achieved 90%+ accuracy with effective training strategies.
- GitHub Link: [brain_tumor](#)

Chat with PDF using LLM

Jul 2025 – Aug 2025

LLM-based NLP Interface — Python, LangChain, Streamlit, Hugging Face

- Created a document chatbot application that queries PDFs using Large Language Models (LLMs).
- Leveraged LangChain for text parsing, embeddings, and vector search.
- Built an intuitive Streamlit UI with context-aware responses.

Automated Daily AI News Email System

Nov 2025 – Dec 2025

Automation & Backend — Python, APIs, Docker, Email Automation

- Built an automated system that fetches and curates daily AI news from multiple online sources via APIs.
- Summarized and delivered the news automatically to email inboxes every day.
- Scheduled and containerized the tool using Docker for reliable daily execution.

EDUCATION

B.Tech in Computer Science and Engineering

2023 – Present

VIT Bhopal University, India

CGPA: 8.8/10 (Till 6th Semester)

Senior Secondary (Class 12), CBSE

2020 – 2022

Shradhalaya Public School (Sps), Rawatbhata

89%

Secondary (Class 10), CBSE

2018 – 2020

St.Paul's Secondary School

95%

LANGUAGES

- Hindi (Fluent)
- English (Fluent)
- Japanese (Basic proficiency)
